

[Command For Command Prompt For Hacking](#)

```
Administrator: C:\Windows\system32\cmd.exe

C:\xampp\htdocs\Vonster>netsh /?

Usage: netsh [-a AliasFile] [-c Context] [-r RemoteMachine] [-u [DomainName\]UserName] [-p Password | *]
[Command | -f ScriptFile]

The following commands are available:

Commands in this context:
?           - Displays a list of commands.
add         - Adds a configuration entry to a list of entries.
advfirewall - Changes to the `netsh advfirewall' context.
branchcache - Changes to the `netsh branchcache' context.
bridge      - Changes to the `netsh bridge' context.
delete      - Deletes a configuration entry from a list of entries.
dhcpclient  - Changes to the `netsh dhcpclient' context.
dnsclient   - Changes to the `netsh dnsclient' context.
dump        - Displays a configuration script.
exec        - Runs a script file.
firewall    - Changes to the `netsh firewall' context.
help        - Displays a list of commands.
http        - Changes to the `netsh http' context.
interface   - Changes to the `netsh interface' context.
ipsec       - Changes to the `netsh ipsec' context.
lan         - Changes to the `netsh lan' context.
mbn         - Changes to the `netsh mbn' context.
namespace   - Changes to the `netsh namespace' context.
nap         - Changes to the `netsh nap' context.
netio       - Changes to the `netsh netio' context.
p2p         - Changes to the `netsh p2p' context.
ras         - Changes to the `netsh ras' context.
rpc         - Changes to the `netsh rpc' context.
set         - Updates configuration settings.
show        - Displays information.
trace       - Changes to the `netsh trace' context.
wcn         - Changes to the `netsh wcn' context.
wfp         - Changes to the `netsh wfp' context.
winhttp     - Changes to the `netsh winhttp' context.
winsock     - Changes to the `netsh winsock' context.
wlan        - Changes to the `netsh wlan' context.

The following sub-contexts are available:
advfirewall branchcache bridge dhcpclient dnsclient firewall http interface ipsec lan mbn namespace nap
