This Policy applies to the City-wide provision of sports floodlighting which must be designed and installed so that the applicable visual tasks can be comfortably performed by both the Participants and the Officials. Requirements for sports floodlighting depend on the nature of the sport, the speed and size of the ball and required speed of performance of user activities. The layout of the playing area, proximity to residents and site constraints will determine the most suitable locations and number of the poles, to ensure luminaire uniformity and minimise glare.

Therefore, the City seeks to provide a standard level of provision for lighting at facilities in line with Australian and other relevant Standards, as far as practicable. Sports floodlighting shall meet the lux level standards set by the Australian Standards for Sports Lighting – Australian Standard AS2560. The City's standard provision for lighting is shown in the table below:

Sport	Level of play	Aust. Standard LUX level
Hockey/Lacrosse	Training	250 LUX
	Match*	500 LUX
Baseball/Softball	Training	Infield 250 LUX Outfield 150 LUX
	Match*	100 LUX
Football (all codes)	Training	50 LUX
	Match*	100 LUX
Netball/Basketball	Training	100 LUX
	Match*	100 LUX
Tennis	Training	150 LUX
	Match*	250 LUX

*Match level refers to amateur club competition and match practice. Training refers to amateur level ball and physical training.

Specific lux lighting levels and lighting design shall be to the Australian Standards for the relevant sporting code or use as follows:

Sporting Open Spaces – Large Ball Sports (Football all codes)

The level of lighting provided at outdoor multi-use sports playing venues will be determined as 'Ball and Physical Training and Match Play' level by the City and the level of lighting will be in accordance with Amateur Level AS2560.2.3.2007. Therefore, the City will provide 100Lux lighting at sporting open spaces that cater for large ball sports.

Sporting Open Spaces – Small Ball Sports

The provision of lighting for small ball sports will be considered on a case-by-case basis and, if determined necessary by the City, lighting will be provided to meet the appropriate Australian Standard for the particular sport. Australian Standards for:

- Baseball and softball are AS2560.2.6 -1994.
- Hockey is AS2560.2.7-1994. Synthetic hockey fields must have sports floodlighting to a minimum of training standard with match play being considered through a business case.
- Cricket currently has no specific Australian Standard but typically follows the AS2560 for the above sports. However, The European Sports Lighting Standard 'EN12193 Light
