AutoCAD

AutoCAD allows developers to write plug-ins. It is the first release of a cross-platform API for plug-ins in addition to the existing Windows-only.NET framework. According to the AutoCAD website "the biggest advantage of the Win32 plug-in API is that it is cross platform, whereas the Autodesk.NET plug-in API is Windows only." The following technologies can be used to write AutoCAD plug-ins: COM and.NET support - The COM and.NET versions allow AutoCAD developers to use C++ to write AutoCAD plug-ins. With the release of AutoCAD 2013 they are implemented on the Windows platform only, but this version of AutoCAD supports a 64-bit version of.NET. Technical Support - The AutoCAD technical support team provides technical advice on AutoCAD products as well as a general forum for discussion. AutoCAD AppStudio - A platform for building custom Windows applications that integrate with AutoCAD and communicate with the platform.
