I lost 2-1, making it seven straight defeats in which my team have scored just four goals and conceded fifteen.

I downloaded Darren's tactic as well However the game hasn't seemed right After losing my first four games in charge it seemed something was up so I played around a little bit and gave my Liverpool team some extra money.. Hi there had a decent amount of succes with "Darrens Fluid" tactic before the patch.. I recently started a save as Liverpool and went about the usual buying and selling of players/staff. [Camptasia download](#)

How did you give your team some extra money? Secondly, there isn't much you can expect after losing so many games in a row, player morale is probably abysmal by now, so you need to encourage them in a team meeting right away.. I like to play short passing football but in both the Stoke game and others I have noticed that balls are knocked long very often and that despite having a pressing mentality, my players never go in for a tackle instead either standing back Read more ». But that changed abruptly After reading a lot (!) about tactics and tinkering with the tactics myself my experience is this: The “new” ME apparantly favours 442-styled tactics with two physical strikers.. Here are the changes that come with this FM 2013 patch: FM 2013 Update 13 2 2 Changelist • Optimised match processing speed for network clients • Fixed crash during processing linked to co-ownerships • Fixed crash during processing linked to missing stadium data • Fixed state saving of staff responsibility setting for match preparation (FMC) Enjoy the game! Hi, Johnny, I’ve been having some problems with FM.. Oh, and avoid the default settings unless you want to use long combinations of shouts.. To download the update, simply save your current game and quit FM 13, then restart Steam and launch the game and your update should start automatically.. If your team is good and the tactics are right, you should win games It’s same with my Arsenal save.. With this money I signed players like Edison Cavani, Stevan Jovetic, Neven Subotic, Marc-Andre ter-Stegen, Daniel Alaba and Isco.. I decided not to sign anybody in the first season cos I actually think the team is good enough! But the match engine seems to have gone back to how it was when the game first came out with all the bugs! My defenders don’t seem to be tackling opposition players nd the keeper will run out to the player with the ball nd then just stand there while through opposition player runs past him nd scores! What made it worse is the fact I got beat away at Man City 7-2 nd away at Aston Villa 3-0 two results that would never happen! For me this is the worse FM for years with too many bugs.. Settings on attacking and very fluid, press more, hard tackling + man marking (even wingers and strikers), short passinghave a go yourself – it’s actually pretty easy to set something decent up with the tactics creator and tweak it.. If that fails, I guess you should start the season all over again I agree that the match engine isn’t perfect but in my view the small flaws I’ve noticed do not really affect the performance of a team overall. b0d43de27c
