What's New In ServeTrue IQ Proxy (formerly Fastream IQ Proxy Server)?

IQProxy can be used as a "reverse proxy" and as a "forward proxy". By using IQProxy as a reverse proxy, it can secure and accelerate your web sites that are exposed to the internet. Using IQProxy as a forward proxy, it can transparently act as a load balancer to secure and accelerate web sites that are exposed to the internet. By using IQProxy as a reverse proxy, there is no need to create a separate router for firewall and web site administration. It can secure/accelerate/speed up web sites that are behind the firewall. By using IQProxy as a forward proxy, multiple LAN machines can share a single Internet connection by passing it through the proxy server. In addition to its excellent speed, IQProxy has been optimized for Windows and uses Windows APIs directly to make the best possible use of the host machine's resources. So, you can expect great performance out of this proxy. IQProxy is able to use multiple CPUs and multiple CPU-cores to provide the best performance possible. IQProxy can be tuned to your needs with a number of options that are configurable at installation time. IQProxy is designed to be a freeware product, so it does not require registration. IQProxy is a beta version of a much more complete product. IQProxy is free and Open Source.
