Android Device Administration API

Source: <http://developer.android.com>

The **Device Administration API** introduced in **Android 2.2** provides device administration features at the system level. These APIs allow developers to create security-aware applications that are useful in enterprise settings, in which IT professionals require rich control over employee devices. The device admin applications are written using the **Device Administration API**. These device admin applications enforce the desired policies when the user installs these applications on his or her device. The **built-in applications** can leverage the new APIs to improve the exchange support.

Policy	Description
Password enabled	Requires that devices ask for PIN or passwords.
Minimum password length	Set the required number of characters for the password. For example, you can require PIN or passwords to have at least six characters.
Alphanumeric password required	Requires that passwords have a combination of letters and numbers. They may include symbolic characters.
